Abstract

This file gives links to both pdf and html files associated with the CMAP representation. The purpose is to give bird's eye of view about the conceptual structures of TGD, and of TGD inspired theory of consciousness and quantum biology. The linked pdf and html files provide pure text based and graphical representations of basically same data and are hoped to serve as complementary representations. The hope is that this material could also serve as a kind of TGD glossary: alphabetical listing was found to destroy the logical coherence and was replaced by topic based one which is more demanding for the user but helps to build the big picture. The representation should be usable for anyone having pdf reader able to read links. The pdf files do not contain links whereas html files contain links to further material.

Contents

1	General View about TGD	4
1.1	What TGD is?	4
1.2	Space-time as a 4-surface in $M^4 \times CP_2$	4
1.3	TGD as unified theory of fundamental interactions	4
1.4	Geometrization	5
1.4.1	Geometrization of classical fields	5
1.4.2	Geometrization of quantum numbers	5
1.4.3	Topological field quantization	5
1.4.4	Magnetic body	5
1.4.5	Geometrization of quantum fields	5
1.5	Zero energy ontology (ZEO)	5
1.6	Quantum TGD as square root of thermodynamics	5
1.7	Hierarchy of Planck constants	5
1.8	Weak form of electric-magnetic duality	5
1.9	Hyperfinite factors and TGD	5
1.10	p-Adic physics	5
1.10.1	p-Adic number fields	5
1.10.2	p-Adic mass calculations	5
1.10.3	p-Adic length scale hypothesis	5
1.10.4	The identification of p-adic numbers as correlates of cognition and intention	5
1.10.5	The notion of p-adic manifold	6
1.11	Generalized Feynman diagrams	6
1.12	TGD view about elementary particles	6
1.13	The unique role of twistors in TGD	6
1.13.1	$M^4 \times CP_2$ is unique choice for imbedding space	6
1.13.2	Twistor approach to TGD	6
1.14	Comparing TGD with other theories	6
1.14.1	How TGD differs from standard model?	6
1.14.2	How quantum TGD differs from standard quantum field theory?	6

1.14.3	Differences between TGD and string models	6
1.14.4	Similarities between TGD and string models	6
2	More detailed view about TGD	6
2.1	Geometrization of physics	6
2.1.1	General Coordinate Invariance	6
2.1.2	Geometrization of classical fields	6
2.1.3	Geometrization of quantum numbers	6
2.1.4	Geometrization of quantum fields	6
2.1.5	Generalized Feynman diagrams	7
2.2	The notion of imbedding space	7
2.2.1	Imbedding space	7
2.2.2	CP_2	7
2.2.3	Why CP_2 is unique?	7
2.2.4	Why M^4 is unique?	7
2.2.5	Why $M^4 \times CP_2$ is unique?	7
2.2.6	Causal diamonds	7
2.3	Basic Principles of Quantum TGD	7
2.3.1	Zero Energy Ontology (ZEO)	7
2.3.2	Quantum theory as square root of thermodynamics	7
2.3.3	Quantum Classical Correspondence	7
2.3.4	Non-determinisms of TGD	7
2.3.5	General Coordinate invariance	7
2.3.6	Equivalence principle	7
2.3.7	Symmetries of WCW	7
2.3.8	Holography	8
2.3.9	Quantum criticality	8
2.3.10	TGD as almost topological QFT	8
2.3.11	Hyperfiniteness and TGD	8
2.4	Classical physics as exact part of Quantum TGD	8
2.4.1	Quantum Classical Correspondence	8
2.4.2	Non-determinisms of TGD	8
2.4.3	Topological field quantization	8
2.4.4	Weak form of electric-magnetic duality	8
2.5	Concrete realization of Quantum TGD	8
2.5.1	Identification of preferred extremals of Kähler action	8
2.5.2	Kähler-Dirac action	8
2.5.3	Kähler-Dirac equation	8
2.5.4	Generalized Feynman diagrams	8
2.5.5	The unique role of twistors in TGD	8
2.5.6	Twistors and TGD	8
2.6	Comparing TGD with other theories	9
2.6.1	How TGD differs from standard model?	9
2.6.2	How quantum TGD differs from standard quantum field theory?	9
2.6.3	Differences between TGD and string models	9
3	Physics as infinite-dimensional geometry of "world of classical worlds"	9
3.1	General Coordinate Invariance	9
3.2	Zero energy ontology (ZEO)	9
3.3	Structure of WCW	9
3.4	Geometry of WCW	9
3.5	WCW gamma matrices	9
3.6	WCW spinor field	9
3.7	Geometrization of quantum fields	9
3.8	Vacuum functional	9

4	Physics as generalized number theory	9
4.1	Quantum physics as generalized number theory	9
4.2	p-Adic physics	10
4.2.1	p-Adic number fields	10
4.2.2	p-Adic length mass calculations	10
4.2.3	p-Adic length scale hypothesis	10
4.2.4	p-Adic numbers and cognition and intention	10
4.2.5	The notion of p-adic manifold	10
4.3	TGD and classical number fields	10
4.3.1	$M^8 - H$ duality	10
4.3.2	Basic notions behind $M^8 - H$ duality	10
4.3.3	Quaternionic planes of octonions	10
4.3.4	Infinite primes	10
5	Some applications of TGD	10
5.1	Particle physics	10
5.1.1	TGD view about elementary particles	10
5.1.2	Bosonic emergence	10
5.1.3	p-Adic mass calculations	10
5.1.4	Elementary particle vacuum functionals and family replication phenomenon	10
5.1.5	Higgs in TGD	11
5.1.6	SUSY and TGD	11
5.1.7	Leptohadron hypothesis	11
5.1.8	M_{89} hadron physics	11
5.2	Nuclear physics	11
5.2.1	Nuclear string model	11
5.2.2	Widom-Larsen theory from TGD point of view	11
5.3	Condensed matter physics	11
5.3.1	High temperature superconductivity	11
5.3.2	Quantum Hall effect and hierarchy of Planck constants	11
5.3.3	Rotating magnetic systems and dark matter	11
5.4	General Relativity, astrophysics, and cosmology	11
5.4.1	Many-sheeted space-time and topological condensation	11
5.4.2	TGD and GRT	11
5.4.3	TGD inspired cosmology	11
5.4.4	Cosmic strings	11
5.4.5	The origin of cosmological constant	11
5.4.6	TGD and cosmology	12
5.4.7	Gravitational anomalies	12
5.4.8	Astrophysics and TGD	12
6	TGD and Quantum Biology	12
6.1	Motivating anomalies	12
6.1.1	Anomalies behind TGD view about biology	12
6.1.2	Anomalies associated with cell membrane	12
6.1.3	Effects of ELF radiation on vertebrate brain	12
6.1.4	Pollack's observations	12
